Thank you for reporting an STD. All information will be managed with the strictest confidentiality.

## PARTNER MANAGEMENT PLAN INSTRUCTIONS

### Gonorrhea or Chlamydial Infection: Partner Treatment

**All partners should be treated as if they are infected.**

**If the provider takes responsibility to ensure partner treatment**, the provider should examine and treat all patient's sex partners from the previous 60 days.

If this is **not** possible, patients should be offered medication to give to as many of their sex partners as they are able to contact and/or should be referred to the Public Health - Seattle & King County STD Program for partner notification assistance.

**Free medication is available for your patient's partner(s).**

**To obtain FREE medication** for your patient's partner(s), call or fax a prescription to one of the pharmacies participating in your area.

Click the link for a prescription form [click here for the prescription form](http://www.kingcounty.gov/healthservices/health/communicable/std/providers/pharmacies) or for a list of participating pharmacies [www.kingcounty.gov/healthservices/health/communicable/std/providers/pharmacies](http://www.kingcounty.gov/healthservices/health/communicable/std/providers/pharmacies).

**Note: Only participating pharmacies have** stocks of **FREE Public Health medication** to dispense to patients for their partner(s).

Public Health may also provide free medication to your patient to give to his or her partner(s).

Public Health recommends that you refer patients with any one or more of the following risks to the health department for help notifying their partners:

- Patient with 2 or more sex partners in the last 60 days, or
- Patient does not think he/she will have sex again with sex partners from the last 60 days, or
- Patient is unable/unwilling to contact one or more partner(s), or
- Patient is a man who has sex with other men

Although Public Health requests that you refer patients with these risks to us, we also ask that you make every effort to help patients with these risks assure that their partners are treated, either by seeing the partners yourself or by offering patients free medication to give to their partners.

**Complete the partner management plan** on the Confidential Sexually Transmitted Disease Case Report FAX form to define a partner management plan.

For copies of this case report or questions on how to fill it out, call the Public Health STD Program: **206 744-3954**.

### Other STDs: Partner Treatment

All patients with infectious syphilis, chancroid, LGV or granuloma inguinale are routinely contacted by Public Health. Patients diagnosed with genital herpes should be advised to notify their sex partners and should be informed that their partners should contact their provider for testing.

## RECOMMENDED REGIMENS FOR ANTIMICROBIALS LISTED ON CASE REPORTS\*

#### Gonorrhea (uncomplicated):

Ceftriaxone .....	250 mg IM, single dose,	<b>OR</b>
Cefixime.....	400 mg PO, single dose	

#### Alternatives:

Azithromycin ..... 2g PO as a single dose (additional chlamydia therapy not needed)  
 Cefpodoxime ..... 400 mg PO, single dose,  
 Health care providers should no longer use fluoroquinolones (Levofloxacin or Ciprofloxacin) as first line therapy due to increased prevalence of quinolone-resistant *Neisseria gonorrhoeae* (QRNG).

#### Plus

Azithromycin .....	1g PO as a single dose,	<b>OR</b>
Doxycycline.....	100 mg PO BID for 7 days	

#### Chlamydia Trachomatis (uncomplicated):

Azithromycin .....	1g PO single dose,	<b>OR</b>
Doxycycline.....	100 mg PO BID for 7 days,	<b>OR</b>
Erythromycin.....	(base 500 mg PO QID for 7 days,	<b>OR</b>
	(ethylsuccinate) 800 mg PO QID for 7 days,	<b>OR</b>
Levofloxacin.....	500 mg PO, for 7 days,	<b>OR</b>
Ofloxacin.....	300 mg PO, BID for 7 days	

#### Syphilis (primary, secondary or early latent < 1 year)

Benzathine penicillin G ..... 2.4 million units IM in a single dose

#### Syphilis (latent > 1 year, latent of unknown duration, tertiary [not neurosyphilis])

Benzathine penicillin G ..... 2.4 million units IM for 3 doses at 1 week intervals
